**Bertinex**, a North Italian Company, is a reference point at international level in the specific market of machines and equipment to be used in environments classified as dangerous due to explosive atmosphere.

The main **Bertinex's** activity is to flameproof any type of standard machinery, diesel engines, electric equipment where flameproofing can be technically achieved.

The flameproof conversion is a "Tailor Suite" prepared

for the Customer and complying with the requested standards and with the technical specifications of the product to be flameproofed.

The approach of **Bertinex** to the European and Extra-European markets wants to be a support to construction companies, resalers and users of flameproofed machines, plants and units, to whom we can offer our advice to meet their specific requirements.
